

Nurturing Young Minds through Critical Thinking

For over 40 years, Times NIE has empowered students to connect classroom lessons with the real world. It values how students think, not just what they think. By diving into real-world issues through diverse perspectives, it sparks curiosity, inviting them to question, analyse, debate, and reflect. The result? **Young minds that think critically and independently.**

Critical Thinking Every Day

Critical thinking is the ability to examine ideas closely, question assumptions, analyze evidence, and evaluate conclusions. At Times NIE, it's woven into everyday reading through news, current affairs, and thought-provoking prompts, that help students grasp context, challenge assumptions, and think deeply about the world around them.

Aligned with
NEP 2020

Future-Ready Minds

Aligned with the vision of NEP 2020, Times NIE promotes Enquiry-based learning, problem-solving and independent thought. By embedding critical thinking into age-appropriate content and classroom-ready resources, it prepares students not just for exams, but for confident decision-making, responsible citizenship and success in an ever-changing world.

Thinking Better.
Learning Smarter.
Leading tomorrow.
